A 参数空间：选择变化方向

实线：只改变 u；虚线：只改变 v。

r

B 曲面上：对位置向量求偏导

$\mathbf{r}(u, v) = (u, v, (u^2 + v^2)/2)$

$J_{\mathbf{r}}\mathbf{e}_1 = \mathbf{r}_u = (1, 0, 1/2), \qquad J_{\mathbf{r}}\mathbf{e}_2 = \mathbf{r}_v = (0, 1, 1/2)$
