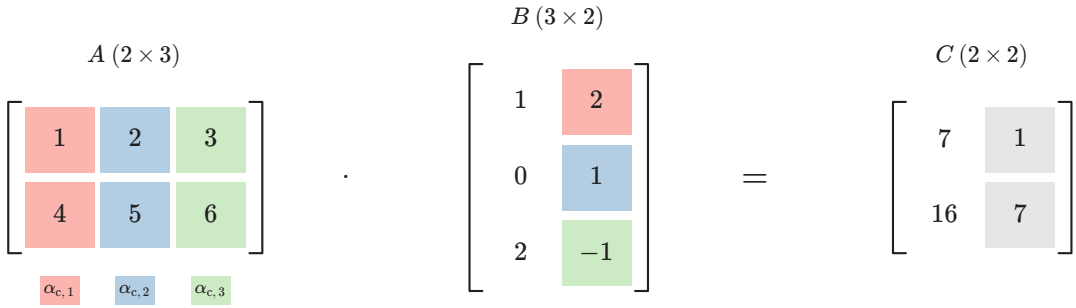
$$\gamma_{c,j} = A\beta_{c,j} = \sum_{k=1}^{n} b_{kj}\alpha_{c,k}$$



$$A\beta_{c,2} = b_{12}\alpha_{c,1} + b_{22}\alpha_{c,2} + b_{32}\alpha_{c,3}$$

$$2\begin{bmatrix}1\\4\end{bmatrix} + 1\begin{bmatrix}2\\5\end{bmatrix} + (-1)\begin{bmatrix}3\\6\end{bmatrix} = \begin{bmatrix}1\\7\end{bmatrix}$$

A 的列是被组合的向量，B 的一列是组合系数。
