A 两个位置矢量相减，得到位移

$$\Delta\mathbf{r} = \mathbf{r}(t+h) - \mathbf{r}(t)$$

B 缩放位移，逼近切矢量

$$\mathbf{r}'(t) = \lim_{h\to 0} \frac{\Delta\mathbf{r}}{h}$$

h = 1.1　h = 0.55　h = 0.15　r′(t)
