A 参数空间：选择变化方向

实线：只改变 u；虚线：只改变 v。

B 曲面上：对位置向量求偏导

$$d\mathbf{r} = \mathbf{r}_u\,du + \mathbf{r}_v\,dv, \qquad \mathbf{r}_u = (1, 0, 1/2), \quad \mathbf{r}_v = (0, 1, 1/2)$$
