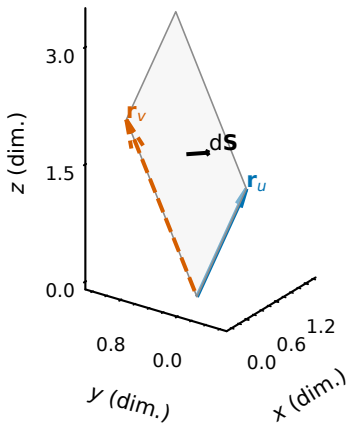
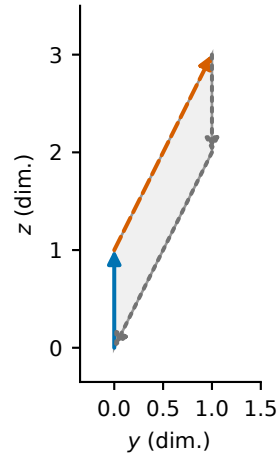
A



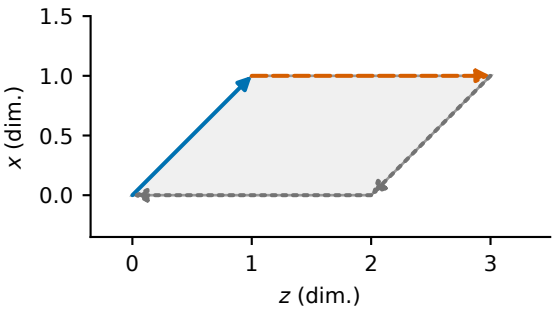
$r = (u, v, u + 2v)$; $\mathbf{r}_u \times \mathbf{r}_v = (-1, -2, 1)$

B



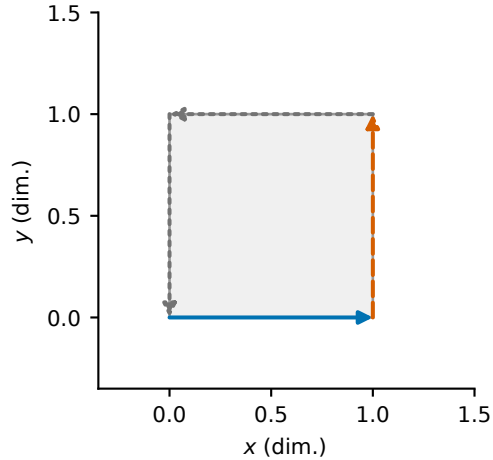
$\mathrm{d}S_x = -\mathrm{d}u\,\mathrm{d}v$; signed unit area = -1

C



$\mathrm{d}S_y = -2\mathrm{d}u\,\mathrm{d}v$; signed unit area = -2

D



$\mathrm{d}S_z = +\mathrm{d}u\,\mathrm{d}v$; signed unit area = +1
