

两条路径均从 A 到 B
$\mathbf{F} = (6xy,\ x^2 + y)$

$\int_{C_1} = 5/2, \qquad \int_{C_2} = 17/6$

正向边界为 C_1 接 $-C_2$
竖切片高度为 $x - x^2$

$\iint_D \kappa\, dA = -1/3$
$= 5/2 - 17/6$
